

TRAVEL CONFIDENTLY WITH YOUR SKB CASE

As a professional Audio Engineer, your number one priority when traveling is to securely transport your expensive, sensitive and highly customized gear. Transporting products that truly protect your gear, are of vital importance.

With our wide variety of SKB transport systems for mixers, rack systems and accessories, we provide you maximum protection, effortless mobility and in-use functionality. Our extensive range of injection molded and roto molded cases and our rack solutions make us the specialist for any packaging solution in the Broadcasting and Pro AV industry.

Continuous innovation: high quality / low weight

Focusing on continuous innovation, we offer our customers the highest quality of transport protection. The '3i Series' injection molded cases have been designed and developed to meet the highest required standards in the market. With weight becoming more and more important, the relatively low weight 3i packaging series are the perfect solution for transporting any delicate equipment.

Newest products

SKB's Fly Racks will revolutionize the way you travel and protect your delicate electronics. These new Fly Racks are equipped with a shallow shock rack frame packed in our 3i injection molded cases. The Fly Rack allows you to easily transport your rack unit and take it out of the case when needed.

Introducing the world's first injection molded waterproof carry-on studio rack case, the 1SKB-iSF2U Studio Flyer is a powerhouse of innovative features packed into a compact, convenient carry-on size. It boasts a virtually indestructible injection molded shell which is lighter, stronger, and less expensive than comparable racks.

For SKB, it is of the utmost importance that your gear can withstand everything, no matter the weather or how bumpy the ride.
