

1SKB ROTO SHOCK RACKS

The 1SKB Series 20" Shock Racks provide a great value option while not compromising on one key commitment: keeping your equipment safe! These 20" deep roto molded cases offer serious protection with an internal frame mounted on adjustable elastomer shock absorbers on all eight corners, controlling the effects of shock and vibration on three axes.

This design also makes for enough "sway" space around the internal frame for optimized air circulation and heat dissipation— very important when your delicate equipment is mounted and running.

With our 1SKB Series you also save big on weight versus traditional flight cases and wooden cases. These models well accommodate audio mixers, video recording devices and communication equipment such as routers, switches etc. Typical applications are in broadcast, music, pro audio, outdoor events and many more markets.

Stacking ribs for secure transport

Molded in handles provide an easy & secure grasping point

Shock absorber for protection of your payload

Rockable Depth	Available Height Units	Waterproof (IP67)	Water resistant	Rated Duty	Wheels integrated	Military Certified	Shock Absorbed	Stackable	Rack removable
